Professional Summary

AI Engineer with strong foundation in Machine Learning, Deep Learning, and Generative AI, experienced in building intelligent systems using LLMs, Retrieval-Augmented Generation (RAG), and backend APIs. Skilled in developing scalable data-driven applications, optimizing model performance, and designing end-to-end AI workflows. Proficient in Python backend development, data processing, and applied AI solutions across real-world problem domains.

Technical Skills

Gen AI & LLMs	LangChain, LangGraph, LlamaIndex, Prompt Engineering, RAG Pipelines
Machine Learning & DL	PyTorch, TensorFlow, Scikit-learn, CNNs, NLP, Model Optimization
Data & Analytics	Pandas, NumPy, Data Processing, Feature Engineering, EDA
Vector & Search	ChromaDB, FAISS, Embeddings, Semantic Search, Hybrid Search
Backend & APIs	FastAPI, Flask, REST APIs, Microservices
Programming	Python, SQL, C#, Java, C
Cloud & Tools	AWS (Basics), Git, CI/CD Concepts

Education

B.Tech — Artificial Intelligence & Machine Learning (With Honors) 2022 – 2025
GMR Institute of Technology, Rajam **CGPA: 8.46 / 10**

Diploma — Computer Engineering (Distinction) 2019 – 2022
Sree Vidyanikethan Engineering College, Tirupati **85.97%**

Experience

AI/ML Developer Intern | [ReNote AI](#) Aug 2024 – Nov 2024

- Engineered end-to-end RAG pipelines for document digitization using OCR, designed semantic retrieval systems with reranking to reduce latency by 30%, and implemented evaluation loops to improve LLM output reliability and factual consistency in production workflows.

Projects

Indian Legal RAG Chatbot | [GitHub](#) ↗

- Developed a scalable AI system using RAG architecture indexing 100+ legal documents, implementing hybrid retrieval, contextual compression, and evaluation strategies to improve response relevance by 30% and reduce hallucinations by 25%.
- Tech:* LangChain, LangGraph, ChromaDB, OpenAI/Gemini APIs, FastAPI

Cyber Intelligence Agentic System | [GitHub](#) ↗

- Built an AI-driven automation system with orchestration, tool execution, and data pipelines for threat intelligence workflows, improving efficiency by 35%.
- Tech:* LangGraph, OpenAI API, Hugging Face, NLP Pipelines

AI Navigation System | [GitHub](#) ↗

- Engineered an edge-based computer vision system achieving 15–20 FPS real-time detection, optimizing inference pipelines for low-latency performance and integrating TTS-based feedback.
- Tech:* Python, YOLOv8s, OpenCV, Edge AI, TTS

AI Attendance System | [GitHub](#) ↗

- Developed a CNN-based facial recognition system with 90% accuracy and backend APIs for real-time attendance logging, reducing administrative workload by 60%.
- Tech:* Python, TensorFlow/Keras, CNN, Flask, Firebase

Automated OMR Evaluator | [GitHub](#) ↗

- Built an automated grading pipeline using image processing techniques, achieving 85–90% accuracy and reducing evaluation time by 70%.
- Tech:* Python, OpenCV, NumPy

Hobbies

- Singing
- Reading Books
- Sketching
- Playing Violin
- Building Games
